# PARTNER INSTITUTIONS AROUND THE GLOBE

# 6 REASONS WHY YOU SHOULD STUDY ABROAD

# 1. Travel the World

Having an academic experience abroad will give you new perspectives and enhance your understanding of your area of study. You will be able to travel and explore cities, towns and even other countries around you. Sharing with others in a different context will help you develop the skills needed to succeed in a globalized world.

# 2. Improve Your Language Skills

The more effective way to learn a language is to be immersed in a culture that speaks the language you're learning. Studying abroad will give you the opportunity to communicate with new professors, students, and friends. As you improve your language skills, you will build bridges and create long-lasting connections.

# 3. Know Another Culture First-Hand

Learning about a different culture is more than just knowing the differences in language, food, and personal habits. Being fully immersed in the culture you visit, you will grasp the different beliefs, perceptions, values, and social dynamics that make it unique. This will help you develop trust and working relations with peers, academics, and even potential business partners abroad.

## 4. Learn About Yourself

Think global and discover new strengths and abilities, conquer new challenges, and solve new problems. You will encounter situations that are wholly unfamiliar to you and will learn to adapt and respond in effective ways. After having your experience abroad, you will return home with new ideas and perspectives about yourself and your own culture. By challenging your beliefs, values, and goals, you will make better decisions both professionally and personally.

## 5. Gain Confidence and Independence

As you travel and study on your own, you will have to find your way around new cities or towns, learn to connect to new people, and practice living daily life in a different language. You will learn to navigate unexpected situations, giving you the confidence to take on bigger and more complex challenges.

## 6. Begin Building your International Network

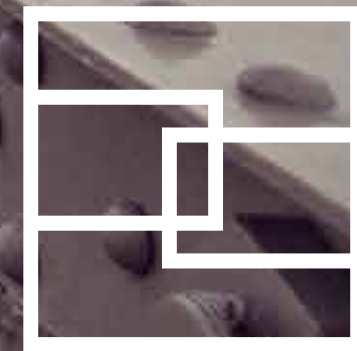

Networking is all about sharing your knowledge, experience and interests with others around you while building working relationships that can increase your impact. Studying abroad will not only connect you with local peers and faculty but other international students who are as far from home as yourself.

# DUAL DEGREE PROGRAMS

Would you like to get an undergraduate or graduate degree at a university abroad? Dual degrees are a great option, as they give you the opportunity to obtain a degree from an international university without the commitment to a full program. Also a dual degree gives you an advantage in pursuing an international career and demonstrates an ability to adapt to a new culture. They also generally cost less than a full program.

Currently ULACIT offers two dual degree programs at the Bachelor's or Master's level in conjunction with universities in the U.S.A, Canada and Spain. Just think that, as you finish your major in ULACIT, you will be leaving your alma matter with two degrees.
